SCOPE OF THE WORKS

- build and repairs of underground and aboveground fuel tanks
- tanks for oils, biodergradable oils and heating oils
- containers for acids, alkalics, urea and other chemicals
- corrosion protection of storage tanks
- leakage control systems (EN 13160 – Class 1)
- special lining for steel or concrete structures, remediation of the concrete
- tank cleaning
- tank inspection
- handling area insulations, insulation of emergency collectors
- remediation of dome shafts
- tanks for drinking water and water for general use
- sewage tanks resevoirs
- outer paints of tanks and technological structures
- pipelines
- remediation of large diameter sewers systems (internal surfaces)

20 YEARS OF EXPERIENCE

SPECIALISTS FOR TANK BUILD, REPAIR AND LINING

The company Division „SPECIAL WORKS“ offers a complex solutions for building and revitalisation of the storage tanks for fuels, biofuels, alkohols with or without bio-components.
IDOPS delivers inside lining for storage tanks of acids, alcalics, corrosives, flammables or other chemicals.
IDOPS offers complete maintenance and service worldwide.
The company has modern equipment for special works!

ALL OUR SYSTEMS ARE REACH APPROVED

THE SYSTEM DOPA 1

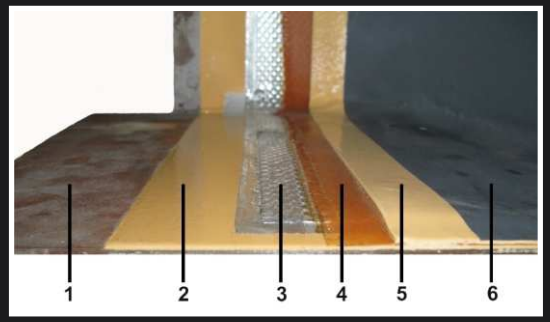

Hazardous substance tanks with the DOPA1 leak protection system actively contribute to underground water conservation.
Our solutions guaranted high corrosion resistance, a long service life and low operating costs.
DOPA protection linings offers the greatest possible safety in industrial facilities, tank farms, airports, governmental facilities, sewage treatment plants, agricultural facilities, residential developments, hospitals and schools.

The system DOPA 1

- additional internal tank lining using the composites with the system of continuons of indication of vacuum leakage (EN 13 160 Class 1)
- the system applicable on the steel or concrete tanks, underground or aboveground
- the system is based on epoxy resins materials
- the system for increasing the value of storage tanks
- the application range includes the second tank bottoms
- the system suitable for existing tanks or for new tanks
- modern enviromental technology with permanent monitoring to fulfill European standards
- our solutions correspond to requirements of the REACH
- permanent protection for your storage tanks from professionals

The composition of the system DOPA 1:

1. The original bottom of the tank
2. Corrosion protection lining with EPOFLEX (Corrosive protection of the tank)
3. Aluminium foil (The creation of the monitored space)
4. Laminated layer
5. Spray application of the EPOFLEX layer
6. Conductive layer (optinal demamded for petrol)

PROLONG THE STORAGE TANK LIFE WITH EXCELLENT PROTECTION USING THE EXCELLENT SWISS TECHNOLOGY!

The company IDOPS is an exclusive representative of company ADISA for Central and East Europe.
The application experiences and references of company IDOPS with DOPA system is used to store the volume more than 200 million liters in total.
This represents area about 60.000 m² of vacuum monitored lining.

ALL OUR SYSTEMS ARE REACH APPROVED

Our Company is approved SCC.

The quality management system is certified by ISO 9001.
